NORTH STAR 82°

Issue number 8.

In this issue:

- Deputy Head Teacher's Message
- Paint, paper and plenty of art
- Bowling us away
- Scaling new heights
- What Parents / Carers need to know about Youtube

Deputy Head Teacher's Message

Dear parent / carer

In this issue we have information about What parents and carers need to know about Youtube, in order to keep our pupils safe. This is fantastic advice which is easy to implement so we would recommended ensuring all measures appropriate to your child are taken to keep them safe.

I have been inundated with pupils bringing their excellent work to show me, many Headteacher Award stickers have been given out and many pupils are nearing their 6th sticker to complete their card and choose a prize.

A special mentions to our bowlers and climbers who were exemplary on their recent trips. There will be many more opportunities coming up and for those who love football, we have two more schools who are keen to play us.

Kind regards

Ash Wadland

Paint, paper and plenty of art

Last term, our creative students worked hard during art lessons to fill our classrooms with their colourful artwork. It is lovely walking around school and seeing their art!

In Aspen class, they were learning about Chinese New Year and have been improving their accuracy skills when cutting and sticking to create some fantastic dragon collages.

Well done to Oak class who have been using watercolour paints and experimenting with creating contrasting colours as well as mixing their own colours in their sketchbooks.

Bowling Us Away!

Recently, a group of pupils from across the classes went on a school trip when they attended a multi school ten-pin bowling tournament and competed against other local SEN and SEMH schools from Bristol.

Mr Lally, Miss Cameron and Miss Clarke were very impressed with how well the pupils represented North Star at the event, with excellent behaviour and sportsmanship.

The pupils were very pleased when they were finished and awarded medals and certificates. We are also very proud of you!

Scaling new heights

Ash Class recently went to Clip n' Climb. After writing about how to escape the dragon in their English lessons, they went on a school trip to practice their ideas.

They made us incredibly proud with excellent behavior and a positive attitude towards trying something new and persevering when they found it tricky.

What Parents & Carers Need to Know about

YOUTUBE

YouTube is a video-sharing social media platform that allows billions of people around the world to watch, share and upload their own videos with a vast range of content – including sport, entertainment, education and lots more. It's a superb space for people to consume content that they're interested in. As a result, this astronomically popular platform has had a huge social impact: influencing online culture on a global scale and creating new celebrities.

INAPPROPRIATE CONTENT

YouTube is free and can be accessed via numerous devices, even without creating a YouTube account. Some content is flagged as 'age-restricted' (requiring the user to be logged into an account with a verified age of 18), but children can still view some mildly inappropriate material. This can include profanity and violence, which some young users may find upsetting.

CONNECT WITH STRANGERS

YouTube is a social media platform which allows people to interact with other (usually unknown) users. Account holders can leave comments on any video they have access to, as well as messaging other users directly. Connecting with strangers online, of course, can potentially lead to children being exposed to adult language, to cyberbullying and even to encountering online predators.

SUGGESTED CONTENT

YouTube recommends videos related to what the user has previously watched on their account, aiming to provide content that will interest them. This is intended to be helpful but can also lead to binge-watching and the risk of screen addiction, especially if 'auto-play' is activated. Users without an account are shown popular videos from the last 24 hours, which might not always be suitable for children.

HIGH VISIBILITY

Content creators can also be put at risk – especially young ones who try to make their online presence as visible as possible. Creating and uploading content exposes children to potential harassment and toxicity from the comments section, along with the possibility of direct messaging from strangers. Videos posted publicly can be watched by anyone in the world.

TRENDS AND CHALLENGES

YouTube is teeming with trends, challenges and memes that are fun to watch and join in with. Children often find these immensely entertaining and might want to try them out. Most challenges tend to be safe, but many others may harm children through either watching or copying. The painful 'salt and ice challenge', which can cause injuries very quickly, is just one of many such examples.

SNEAKY SCAMMERS

Popular YouTube channels regularly have scammers posing as a well-known influencer in the comments section, attempting to lure users into clicking on their phishing links. Scammers impersonate YouTubers by adopting their names and profile images, and sometimes offer cash gifts or 'get rich quick' schemes. Children may not realise that these users are not who they claim to be.

Advice for Parents & Carers

APPLY RESTRICTED MODE

Restricted Mode is an optional setting that prevents YouTube from showing inappropriate content (such as drug and alcohol abuse, graphic violence and sexual situations) to underage viewers. To prevent your child from chancing across age-inappropriate content on the platform, we would recommend enabling Restricted Mode on each device that your child uses to access YouTube.

TRY GOOGLE FAMILY

Creating a Google Family account allows you to monitor what your child is watching, uploading and sharing with other users. It will also display their recently watched videos, searches and recommended videos. In general, a Google Family account gives you an oversight of how your child is using sites like YouTube and helps you ensure they are only accessing appropriate content.

CHECK PRIVACY SETTINGS

YouTube gives users the option of uploading videos as 'private' or 'unlisted' – so they could be shared exclusively with family and friends, for example. Comments on videos can also be disabled and channels that your child is subscribed to can be hidden. If your child is only uploading videos that are protected as 'private', they are far less likely to receive direct messages from strangers.

CHECK OTHER PLATFORMS

Influential content creators usually have other social media accounts which they encourage their fans to follow. Having an open discussion about this with your child makes it easier to find out how else they might be following a particular creator online. It also opens up avenues for you to check out that creator's other channels to see what type of content your child is being exposed to.

MONITOR ENGAGEMENT

YouTube is the online viewing platform of choice for billions of people, many of them children. Younger children will watch different content to older ones, of course, and react to content differently. You may want to keep an eye on how your child interacts with content on YouTube – and, if applicable, with content creators – to understand the types of videos they are interested in.

LIMIT SPENDING

Although YouTube is free, it does offer some in-app purchases: users can rent and buy TV shows and movies to watch, for example. If you're not comfortable with your child purchasing content online, limit their access to your bank cards and online payment methods. Many parents have discovered to their cost that a child happily devouring a paid-for series quickly leads to an unexpected bill!
